1. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or to be industrially applicable have not been and will not be examined in respect of:

☐ no international search report has been established for said claims Nos. _.

2. A written opinion cannot be drawn due to the failure of the nucleotide and/or amino acid sequence listing to comply with the standard

☐ the written form has not been furnished or does not comply with the standard.

☐ the computer readable form has not been furnished or does not comply with the standard.

V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. statement

Novelty (N)	Claims 2-19	YES
	Claims 1	NO
Inventive Step (IS)	Claims 2-19	YES
	Claims 1	NO
Industrial Applicability (IA)	Claims 1-19	YES
	Claims NONE	NO

2. citations and explanations

Claim 1 lacks novelty under PCT Article 33(2) as being anticipated by Eickmeyer et al. (EP 747,816).

Eickmeyer et al. taught executing a predetermined number of instruction of a first thread before switching to a second thread (abstract).

Claim 1 lacks novelty under PCT Article 33(2) as being anticipated by Davis et al. (US 5,337,617).

Davis et al. taught executing a predetermined number of instruction of a first thread before switching to a second thread (Col. 4, lines 35-57).

Claims 2-19 meet the criteria set out in PCT Article 33(2)-(4), because the prior art does not teach or fairly suggest the maintaining of the discrete count of the quantity of instruction information dispatch or the application of the flow marker in the system as describe or the interaction between the predetermined time intervals and the counting of the quantity of instructions.
